Education

Indian Institute of Technology, Madras

BS in Data Science (CGPA: 8.25)

Relevant Coursework: Data Science, Mathematics, Statistics, Python

Madras, India

May, 2028

Projects

Linear Regression Visualisation

Built an linear regression model with visualisation of the gradient descent and the changing best fit line, this allows changes in initial condition, learning rate and epochs. [Project Link](#)

Tech Used: **Python, Pandas, Numpy, Plotly, Streamlit, Linear Regression**

Book Recommendation System

Developed a machine learning-based book recommendation system with a user-friendly interface using Streamlit, enabling personalized book suggestions based on user preferences. [Project Link](#)

Tech Used: **Python, Pandas, Scikit-Learn, BeautifulSoup, Recommender, Streamlit**

Penguin Breed Classification Model

Developed a machine learning model to classify penguin species based on features like bill length and flipper size, with a simple Streamlit app for user interaction. [Project Link](#)

Tech Used: **Python, Pandas, Scikit-Learn, BeautifulSoup, Streamlit**

California House Pricing

Built a regression model to predict California house prices based on features like location, income, and housing characteristics, with a Streamlit interface for easy input and visualization. [Project Link](#)

Tech Used: **Python, Pandas, Plotly, Streamlit, Tensorflow, Seaborn**

Monte Carlo Simulation

Implemented Monte Carlo simulation to estimate the value of π by randomly sampling points in a unit square, with results visualized through a simple Streamlit app. [Project Link](#)

Tech Used: **Python, Plotly, scikit-learn**

Certifications

- » What is Data Science? [[Coursera Certificate Link](#)]
- » Tools for Data science [[Credit link](#)]
- » Data Science Methodology [[Certificate Link](#)]
- » Python for Data Science, AI and Development [[Certificate Link](#)]

Technical Skills

Programming Languages : Python, SQL

Frameworks : TensorFlow, Scikit-Learn, Numpy, Pandas, Seaborn, Matplotlib

Other Tools : Google Sheets, Power BI, Excel, Jupyter Notebook
